### Produktinformationen "BC-DGKat623"

Kramer's BC-DGKat623 is a 4-pair U/FTP (unshielded around foiled twisted pair) cable designed as the ideal companion to Kramer's twisted pair digital transmitter-receiver sets to provide optimum range and performance. The cable construction is based on unique insulation foam materials and shielding materials usually not used in conventional IT CAT cables. As a result Kramer BC-DGKat623 cables maintain much better signal integrity on longer cable runs and provide less crosstalk between the twisted pairs inside the cable for modern high-frequency digital video signals. Using Kramer's BC-DGKat623 cable adds much needed "invisible power reserve" to your installation to make them hassle-free and ensuring piece of mind in demanding AV applications.
