Produktinformationen "Kramer BRAINware"

Kramer BRAINware is an enterprise-class, revolutionary, user-friendly, software application that enables you to execute all your room control actions straight from a KT-107 family touch panel, VIA Connect PLUS or KC-BRAINware-5/25/50 without installing a physical brain between the user interface and the controlled devices. Using the power of Kramer Control cloud-based control and space management platform, Kramer BRAINware enables your touch panel to operate multiple devices over Ethernet such as scalers, video displays, audio amplifiers, Blu-ray players, sensors, screens, shades, door locks, and lights. Designed specifically for KT-107 family touch panels, VIA Connect PLUS, and KC-BRAINware hardware platforms, Kramer BRAINware uses custom user interfaces configured in the Kramer Control Builder. Designing a system was never easier, with Kramer Control's programming free, intuitive drag and drop Builder. Install, configure and modify your control system without any prior knowledge in programming. Kramer BRAINware is available as a one-time license.
