Produktinformationen "616T/616R"

616T and 616R are detachable dual-link DVI over MM fiber ultra-reach transmitter and receiver pair. They transmit uncompressed resolutions of up to 1080p@60 over dual-link DVI to a range of up to 500 meters (1640 feet). They use duplex multimode fiber optic cable with two LC connectors. 616T converts dual-link DVI signals to optical signals that it transmits to 616R. 616R decodes the optical signals back to a dual-link DVI signal.
